

Finance Options BeerLab

The BeerLab is available on a finance scheme^a allowing you to avoid capital outlay and spread your payments over 2 or 3 years. This provides you with a brand new BeerLab with minimal up-front expenditure and spreads the cost over time via fixed payments. The scheme will finance everything related to the purchase and installation of the analyser.

Payments are 100% deductible against taxable profits and can be structured to fit your requirements. The scheme reduces the drain on your working capital and is generally not classified as debt but as a running cost or expense.

A New Analyser Every Few Years

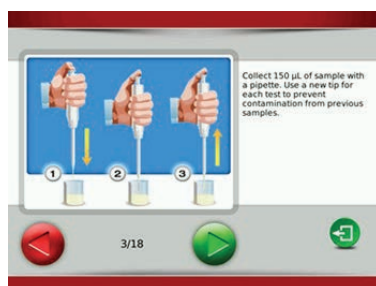

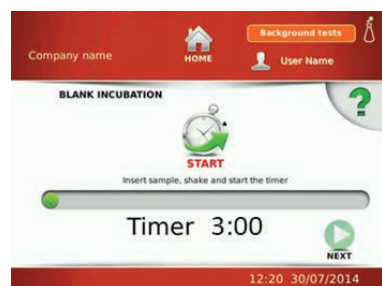

At the end of the scheme you have the option to buy the BeerLab for a nominal fee or renew the scheme and receive a brand new replacement analyser.

The BeerLab is available without a deposit at the following rates:

Term	Monthly Payment	Monthly Payment After Tax Relief
36 Months	£177.63 ^b	£142.10 ^c

BeerLab

The BeerLab is a fast, simple and reliable beer analyser for determining multiple parameters in beer and water. It is specifically designed for monitoring of the brewing process and ensuring quality control in breweries and microbreweries. It is easy to use and requires no calibration or maintenance.

The BeerLab software guides the user through the testing process through clear graphical instructions via touch-screen LCD.
