

Finance Options FoodLab

The FoodLab is available on a finance scheme^a allowing you to avoid capital outlay and spread your payments over 2 or 3 years. This provides you with a brand new FoodLab with minimal up-front expenditure and spreads the cost over time via fixed payments. The scheme will finance everything related to the purchase and installation of the analyser.

Payments are 100% deductible against taxable profits and can be structured to fit your requirements. The scheme reduces the drain on your working capital and is generally not classified as debt but as a running cost or expense.

A New Analyser Every Few Years

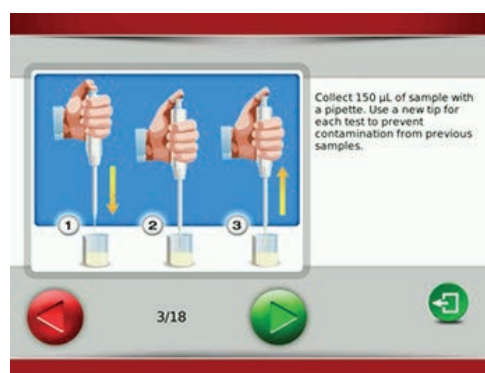

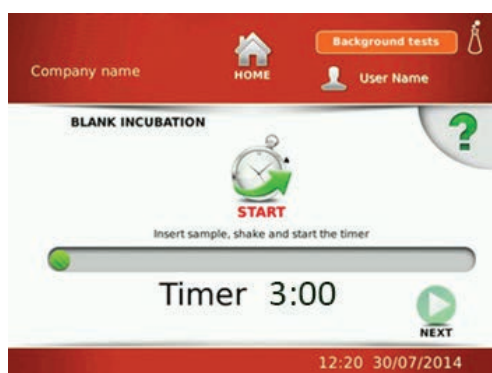

At the end of the scheme you have the option to buy the FoodLab for a nominal fee or renew the scheme and receive a brand new replacement analyser.

The FoodLab is available without a deposit at the following rates^b:

Term	Monthly Payment	Monthly Payment After Tax Relief
36 Months	£177.63 ^c	£142.10 ^d

FoodLab

The FoodLab is a fast, simple and reliable analyser for determining multiple parameters in a wide range of food products including fats and oils, snacks, nuts, dairy products and eggs. Parameters include free fatty acids, peroxide value, *p*-anisidine value, ammonia, chloride, lactic acid, hydrogen peroxide and lactose. It can also test the oxidation state of fats in finished products. Easy to use it requires no calibration or maintenance.

The FoodLab Touch software guides the user through the testing process through clear graphical instructions via touch-screen LCD.

^a Subject to credit rating

^b Price does not include accessories or additional pipettes which may be required for some tests

^c Not including VAT

^d Assumes corporation tax at 20%
