

Orion pH Meter Calibration Service

Our calibration service is designed to ensure that your analytical measurements continue to meet the highest standards.

Our service centre provides a comprehensive diagnostics test and a full internal electronic calibration verification traceable to UKAS certified standards.

This extensive examination of your Orion pH meter is available for just £100.00 + VAT (includes return carriage). On examination of your meter we may identify additional work that is needed before it can be tested, in which case we will contact you before proceeding. Upon completion a certificate is supplied along with a meter test report.

Meters should be sent in appropriate packing to:

QCL, Unit 1, Whitwick Business Centre, Whitwick Business Park, Stenson Road, Coalville, Leicestershire, LE67 4JP

Please enclose power adaptor if applicable, do not return electrode or lead. The completed return form and safety and cleanliness certificate below must also be enclosed. If returning more than one meter please complete separate forms for each unit.

Please contact us if you would like a quotation for an engineer to perform the service/calibration at your site.
